On the Cover

FIRST DECADE. As Indiana State University Evansville observes the First Decade it is easy to note the change in the ISUE complexion. In 1965 students entered Centennial School to attend classes at the Evansville Campus. With the start of the '74-'75 academic year students can take advantage of the modern facilities available to them in the University Center located on the 300 acre campus complex.

ATTENTION ALUMNI

Do you have a new job?
Do you have a new title?
Do you have a new home?
Do you have a new baby?
Do you have good news to tell, or bad news?
Do you have a wedding planned?
Have you been married recently?
Have you been elected or selected for a special task?
What do we need to know about you?
We look forward to having you send us information about yourself, your family, and your friends who are alumni of ISUE. We feel that personal news will interest ISUE alums all across the United States.
Take time to send some information today to:

Alumni Association Indiana State University Evansville 8600 University Boulevard Evansville, Indiana 47712

THE FIRST DECADE: A STEP IN TIME

A public higher education campus for Evansville? "Why not?" asked community leaders over coffee one day in early 1964. Almost in the vein of Robert Kennedy's theme"Some men see things as they are and ask why, I dream of things yet to be and ask why not?," the germ of an idea for public higher education was born. The product of local community initiative, Indiana General Assembly direction, and Indiana State University Board of Trustees and University administration implementation, Indiana State University Evansville opened its doors in September, 1965 with two full-time and thirty part-time faculty instructing 412 students in the Centennial Elementary School Building on 12th Avenue. This fall ISUE begins its tenth year in the Evansville community. Not a long span of time as far as universities go. For ISUE, the tenth year is a benchmark in its history. For ISUE, the tenth year is a step in time.

While the temporary campus went into operation in 1965, an advisory board was formed by President Alan C. Rankin to select a site for a permanent campus, to formulate financial and educational requirements for the new university; and to work with the ISU Board of Trustees.

In October, 1966, approximately 1200 acres were optioned between Mount Vernon and Evansville by Southern Indiana Higher Education, Inc. The site consisted of rolling hills, farm land, and woods. The name given to the complex was Mid-America University Center. Land was acquired in December, 1966 when the Catholic Diocese of Evansville

deeded acreage to S.I.H.E., Inc. S.I.H.E., Inc. deeded 120 acres, the Jacob Stubbs farm, to ISU in the spring of 1967 on which to begin construction for the permanent campus. Later more land was deeded and some purchased to round out the 300 acres now owned by ISUE. Southern Indiana Higher Education, Inc. holds 1200 acres of land south of the ISUE property and extending to Burdette Park.

From the beginning efforts were made to offer quality instruction and academic opportunities to students. Academic growth accelerated with junior level courses scheduled in 1967, and a four year degree program went into effect and ISUE awarded its first baccalaureate degrees in June, 1971.

Indiana State University Evansville currently offers baccalaureate programs with a choice of 23 majors and 30 minors, six associate degree programs, one certificate program, and a professional preparation program for secondary education.

Programs were initially accredited through the Terre Haute campus, and in the summer of 1974 Indiana State University Evansville received operationally separate accreditation by the North Central Accreditation Association. The teacher education program has been fully accredited by the Indiana State Department of Public Instruction and the National Council for Accreditation of Teacher Education. The dental hygiene and dental assisting programs have been given provisional approval by the Council on Dental Education of the American Dental Association.

Flexibility was the key word in the construction of the first buildings. The campus (continued on next page)

ISUE President David Rice brings alumni up to date on campus activities as he reviews the developments in the First Decade.

FIRST DECADE (continued)

was planned so that buildings having the highest concentration of students would be in an inner circle and beyond that, buildings with more specialized uses would be given more space. Three building projects were completed in this first decade: the Classroom Science Center, the University Library and the University Center. A fourth structure, the Applied Science and Technology Building will be completed during the 1974-75 year.

The Classroom Science Center houses the administrative offices, lecture halls, science labs, general classrooms, dental clinic and laboratory, greenhouse, faculty offices and an all-purpose area used for physical education classes, social events, and banquets.

The three-level library building has two levels assigned for library functions and one level assigned principally but temporarily to classrooms and faculty offices. As additional library facilities are needed and as additional buildings are constructed, the lower level will be converted to library usage as general classroom and faculty office space become available elsewhere.

The University Center, a tri-level building, houses student organization offices and work areas, conference rooms, a lounge, a grill area, a formal dining area, a recreation area, and the bookstore. The Conference Center connects the University Center to the Library and features multi-purpose rooms which are used for instruction, meetings, and receptions.

The fourth building, the CAST building, will provide opportunities for the development of technology curricula.

A 25-acre Bent Twig area of walking trails, a 7-½-acre lake, playing fields and other recreational facilities have been developed.

A commuter campus, the ISUE student body is primarily made up of Vanderburgh County residents and residents of the four surrounding southwestern counties of Indiana. More than 80 per cent of the students combine a job with their college career.

Buildings off campus used for campus programs are the ISUE Playhouse, used for drama productions, and the ISUE Central Arena, a gym leased from S.I.H.E. for use for instramural and varsity sports activities.

A commuter campus, students drive to campus daily. With the addition of the University Center and space for students during free periods, the student body is staying around the campus more thus allowing for more communication among students and more interest in student organizations. Over 30 student interest groups and fraternities and sororities are active.

The mission of the young campus is simply stated. ISUE exists to serve the economic, intellectual, and cultural life of the region in which it is located. Instruction is

the primary mission of the campus. Research and public service are natural outgrowths of this prime mission. Research is a normal component of many instructional programs and processes and is necessary for the continuous self-renewal required for up-to-date instruction. The public service functions of the faculty and campus focus upon activities commensurate with the instructional mission of the campus and with the needs of individuals, groups and organizations located within the region.

As ISUE observes its First Decade, alumni and friends are encouraged to visit the campus to observe a decade of progress. The campus looks toward the future and will use the past ten years to propel more activity and growth and excellence in the next ten years. The First Decade is A Step In Time.

FROM PRESIDENT'S DESK

OFFERING A HELPING HAND

I wish to take this opportunity to recognize one of our alumni who has contributed a great deal of time and effort for the ISUE Alumni Association. Jean Rickard, our immediate past President, has certainly been one of the main reasons for the success of ISUE's Alumni Association. Jean will continue to serve as a member of this year's Executive Council. Thank you, Jean, for a job well done.

The success of the Alumni Association will depend upon the participation of many alumni

I recall a conversation which I had with one of the 1974 graduates at the Alumni Banquet last May. The graduate inquired about the structure and goals of the Alumni Association. I took the opportunity to ask him if he would work in some manner for the Alumni Association. He responded that he had been hinting for me to ask him, and that he would be happy to help. I am pleased to say that this graduate will be a member of this year's Executive Council.

I wish to invite each of you to participate in the Alumni Association. If you wish to volunteer some of your time, or have any suggestions, please contact any Alumni Officer, any member of the Executive Council, or the Director of Alumni Affairs, Dr John Emhuff. I'll assure you that you will receive a prompt positive response. Let's have another successful year for our Alumni Association.

J. Patrick Hinkle President ISUE Alumni Association

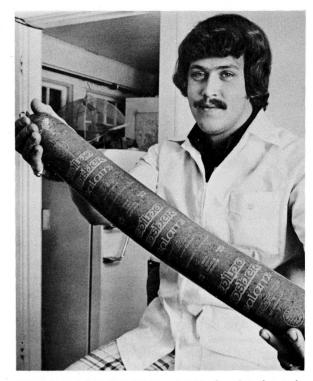

SAY CHEESE

If your first response to the word cheese in a word association game is Velveeta or if you are a cheese connoisseur, you'll enjoy a visit to Helen's House of Cheese on Lincoln Avenue. ISUE graduate Jack Van Wey manages the cheese shop and delicatessen.

Jack explains that Helen's House of Cheese has over seventy types of cheese including domestic cheeses and imported cheeses.

In operation for over fifteen years, Helen's House of Cheese has served Evansville families and businesses, and distant cities and towns through a large mail order operation. Jack began managing the shop in March as the business grew from a small "in the home" business venture managed by his mother-in-law to a full time cheese store and delicatessen.

A business graduate with a major in marketing, Jack is confident about the store and excited with his success in recent months. In addition to wide selection of cheeses, Jack has also initiated a delicatessen with a full line of meats and kosher style foods.

Manager Jack Van Wey holds a salami loaf, an item he stocks along with over 70 cheeses and a variety of fine foods in Helen's House of Cheese.

Kosher foods, foods that have been blessed, carry a special insignia to denote the blessing. Jack stocks kosher bologna and kosher salami and kosher style corned beef plus other kosher style foods. Bakery items are also stocked in the store.

CAMPUS OPEN HOUSE SCHEDULED

Indiana State University Evansville is planning a campus open house on Sunday, October 20 from 1:00 p.m. to 5:00 p.m. Parents of ISUE students will have the opportunity to see the classrooms and modern laboratory equipment as well as meet faculty and other students. Campus facilities will be open and visitors can stroll through the

campus at their leisure. The University Center cafeteria will be serving a complete lunch.

Various students organizations will take part in the Open House with displays and activities. Adequate parking is available on the campus. The ISUE Alumni Affairs Office plans a special reception for all alumni who return to the campus.

NEW DEGREE PROGRAM PLANNING BEGUN

EDITORS NOTE:

Dr. Anthony Tilmans has been appointed Director of Technology Programs and Professor of Technology at ISUE. A native of Pennsylvania Dr. Tilmans received his Ph.D. in civil engineering from Carnegie-Mellon University and his masters and baccalaureate degrees from the University of Pittsburgh. Before joining ISUE, Dr. Tilmans was head of civil engineering technology and assistant to associate dean for engineering technology at University of Pittsburgh at Johnstown. Dr. Tilmans will develop and head up the programs to be offered in the Classroom Applied Science Technology Building currently under construction.

ISUE is developing a four-year bachelor degree program in Engineering Technology, for which the the first class will matriculate in September, 1975. This program will prepare the young men and women required for the applied design, manufacturing, production, and operational needs of existing industry and for those industries which will come into being as a result of the creative efforts of the engineer with the engineering science, research and development oriented background.

There is today a pressing and increasing shortage of technical manpower for our nation's industrial programs. That shortage is equally severe in Southern Indiana and plans for industrial expansion throughout the area during the next decade could be adversely influenced if personnel required for these plans are not available. A parallel problem of critical proportions is the lack of educational opportunity for that large body of high school students with average ability, who desire to pursue a career in the field of engineering technology, not as a technician, who is craft oriented, nor as a present day engineer with the rigorous, theoretical, analytical, synthesis and highly sophisticated mathematical education.

Today, society's needs are vastly different from those of the previous two decades which is the main reason to fill this gap in the engineering manpower situation. Our societal problems are now more domestic and therefore require social competencies By Anthony L. Tilmans
Professor of Technology

as well as the obvious technical competencies. In order to satisfy the social competencies, the engineering technology program must provide the student with such courses as communications (reading, writing, speaking, and listening), engineering economics (mathematics of finance, comparative cost studies and evaluating costs), industrial organization and management (labor market, collective bargaining, cost accounting, marketing, quality control, OSHA, and wages) and engineering law and ethics (contracts, specifications, property, torts and crimes, and professionalism).

The need therefore for those in the community sensitive to the responsibility for educational opportunity as part of the total picture of community economic growth is not to depend on migration of technological manpower, but to provide and retain in the general Southern Indiana region, an adequate supply of competent, technically educated and trained personnel, capable of immediate function and productivity in an environment of the advanced and sophisticated techniques required of the industrial complex of today and the future!

Cafeteria Open

ISUE's long-awaited cafeteria recently began operation in the new University Center. The cafeteria is managed by Saga Food Service, the largest college food service company in the world. As the Director of Saga Food Services on campus commented, "We feel that a well balanced diet is very important to enhance the learning process for higher education."

Cafeteria hours and menu are as follows:

7:30 – 9:00 a.m. Breakfast (eggs, bacon, pancakes, etc.)

 $9:00-10:30 \, a.m.$ Continental Breakfast (cereals,

juice, donuts, etc.)

10:30-11:00 a.m. Closed

11:00-1:30 p.m. Lunch (meats, salads, casseroles,

hot or cold sandwiches,

beverages, etc.)

1:30 - 9:00 p.m. Snacks (sandwiches, salads,

chips, desserts, etc.)

Until the snack bar is completed, snacks will be served throughout the day in addition to regular meals, as shown above.

Any additional catering, banquet or party needs can be arranged by contacting the Food Service Office on campus at ext. 359.

ISUE ALUMNI ASSOCIATION TAKES OFF ON YEAR OF ACTIVITIES AND FELLOWSHIP

by John Emhuff
Director. Alumni Affairs

Last year's activities ended on a very happy note. The annual Dinner Dance was a memorable evening and the Annual Fund drive of the Alumni Association met all of its goals. Events being planned for this year promise to be more exciting than last.

This first weekend in October, a reception is being held for ISUE alumni living in the Indianapolis area. This will be at the Rodeway Inn - Airport. Alumni in the area have been invited, and a large assembly of ISUE alumni are expected. Hosts for the reception are John and Cindy Fehrenbacher and Bob and Mary Ann Roeder.

This year's Homecoming activities on December 14,1974 alumni should circle on their calendars. Homecoming will be the initial home game for the new basketball coach, Wayne Boultinghouse. It will also be the first game in ISUE Central Arena. And, it will mark the first time that the Homecoming Reception will be scheduled immediately following the game rather than preceding it. Again this year, the Athletic Department will make available one free ticket to the ball game for each alumnus.

In addition to the usual Homecoming crowd, the Alumni Association is going to make every attempt to fill the ISUE Central Arena that evening to make it a rousing success. ISUE enjoys a rather impressive record for Homecoming games in that the university is still undefeated at a Homecoming contest. Take advantage of this opportunity to see the Screaming Eagles in action.

Following the Christmas holidays, another first is being planned. Arrangements are in the final stages for the first ISUE-friends trip to an "away" basketball contest. On Saturday January 25, 1975, the Alumni Association will charter a bus to go to the University of Missouri-St. Louis vs. ISUE game. Early discussions of this trip showed a great deal of enthusiasm and interest in attending. Complete details regarding cost, departure time, and details will be mailed at a later date. Anticipated departure from the ISUE parking lot is planned for the afternoon and the return trip will follow immediately after the game.

Those of you who had the opportunity to attend last year's annual Dinner Dance will not want to miss the occasion on May 2, 1975. Again, it is to be held in the Executive Inn in Evansville. It will be on Friday evening so that some of the out-of-town alumni can attend. The Dinner Dance in 1974 proved to be one of the most pleasant evenings of the entire year. Refreshments were excellent, food was great, the entertainment was superb, and the fellowship was beyond description. Members of the class of 1975 will be our guests next spring, and the Alumni Association hopes that an even greater number will attend this event.

Finally, the 1974 Annual Fund drive exceeded expectations. The task that faces the volunteers who will work during the 1975 telefund is great. The 1974 Annual Fund set the pace, and everyone will have to work extra hard to maintain it. The alumni last

Traditional Feast. The ISUE Madrigal Dinners will be held at Indiana State University Evansville on December 7 and 8. Tickets for the dinners will go on sale in late October. To be directed by David Deeg, the Madrigal Dinners will feature a traditional English menu and songs and merriment by the Mid-America Singers.

year proved that they are interested in that margin of difference between the ordinary and the excellent. The Alumni Association expects the 1975 Annual Fund campaign to be even greater.

PROFESSOR NAMED ADVISOR

Howard E. Dunn, ISUE Associate Professor of Chemistry, was named as legislative counselor to Congressman Roger Zion by the American Chemical Society.

The American Chemical Society, aware of the need for scientific input in the decision-making process in government, appoints a chemist or chemical engineer to each member of Congress as a resource person or advisor in scientific matters.

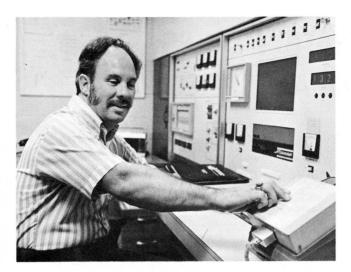

On the ISUE faculty since 1969, Dr. Dunn has been in the field of chemistry for fourteen years. Dr. and Mrs. Dunn and their two children live on Smith Road in Mt. Vernon, Indiana.

Power Plant Operator Ed Walker monitors the main control panel, alert for problems in the heating and air conditioning systems.

What is the difference between a candy bar and a university? Plenty, you say? Of course there is a big difference, but there are also some similarities. A candy bar, no matter how delicious its outside coating may appear, becomes a success only if the interior is as rich and tasty as the veneer, making the complete product a palatable treat. Likewise, a university, no matter how lovely the campus may appear, is efficient only if it is well-staffed, if the physical apparatus is maintained in good working condition, and if the communications pipeline is kept open and flows freely. This story is about three individuals who operate effectively behind the scene at ISUE.

BEHIND THE SCENE

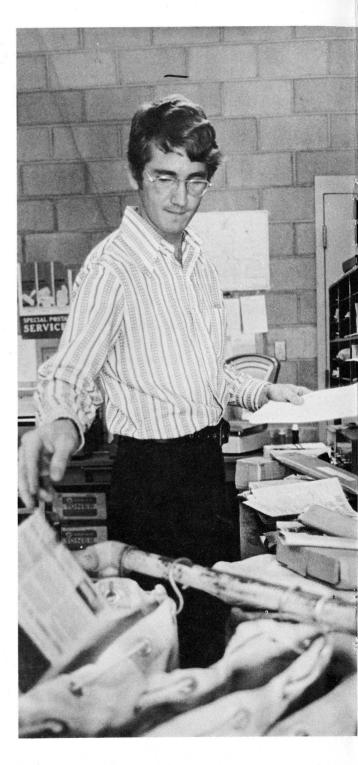

by Judy Rogers

The physical apparatus for the Indiana State University Evansville complex is controlled on a main control panel in the Power Plant. A projection screen shows visually the heating and air conditioning systems. Any trouble in the system -- over-heating, fire, etc., comes into the panel on a critical alarm and is then relayed to a print-out. The Power Plant Operator on duty reads the print-out, consults a log book, and the trouble is pinpointed. All transactions and adjustments are then logged by the Operator.

The Power Plant Operator not only must pay constant attention to the panel, making adjustments when needed, but also works hand in hand with the Security Department. A security monitor is part of the control panel. If a door is opened after hours when all doors have been locked by Security, an alarm sounds on the panel. The Power Plant Operator calls Security, who in turn checks it out.

Ed Walker, Power Plant Operator, explains that one emergency more than offsets the hours when all systems are ticking perfectly. During these times Ed performs regular mainte-

nance of operating equipment and conducts chemical tests on water. One bad moment recently occurred when the air conditioning transformer shorted out. The university personnel withstood a few days of mid-summer heat while a new part was flown in from Texas to make repairs. However, lighter moments also occur to relieve the more routine ones. One call occurred early in the morning this last summer when 12 black angus cattle appeared in the parking lot. The Security Officer on duty called the Power Plant Operator, who in turn called the farmer and owner of the cattle. The farmer rushed to the parking lot, corraled his cattle and drove them home, and so another day began on the control panel.

The Communications pipeline at ISUE consists mainly of the Mailroom and Switchboard. A very important part of this pipeline is the mailroom located in the Library. Larry Feldhaus, Chief Receiving and Mail Clerk, was an ISUE student for 3½ yrs. and received his baccalaureate degree from

Larry Feldhaus can claim he gets more mail than anyone at ISUE and the Chief Receiving and Mail Clerk would be correct as he receives and sorts the daily mail for the university.

Terre Haute in 1970. Larry handles all incoming freight and supplies except food or bookstore items, in addition to processing all mail for the university. Larry has the help of two student workers and uses a campus vehicle to transport heavy items. "The mailroom has grown a good deal," Larry remarked, "when you consider that it began with part-time student workers in the business office." As ISUE grows, the mail load has, understandably, become much heavier. The worst part of the job is, according to Larry, that his work doesn't just stop at 5:00 p.m. No matter how heavy or late the mail is in getting to the mailroom, it has to be processed and taken to the post office for postmark on the same day. Always working toward a more efficient mail system, Larry especially requested that a reminder be placed in this story requesting alumni to forward new addresses.

Another component of the communications pipeline is the Switchboard. Roberta Schweizer has served as one of the "Voices of ISUE" for the past three years. According to Roberta, the telephone switchboard has almost doubled its service in the past 1½ years. "There's just no way to estimate the number of calls coming in each day," Roberta said, "although there are approximately 100 SUVON calls per day." The switchboard handles approximately 150 stations on campus with 14 outside lines.

With the recent office rearrangement in the administrative wing, the switchboard was moved into the entrance hall to serve doubleduty as an information desk. The new duty is interesting, but also time-consuming. The only drawback, according to Roberta, is that when she's on the switchboard, people tend to think she's ignoring them until she can stop and talk.

The most hectic days in the life of a switchboard operator must be the snow days because EVERYBODY calls in!. One caller suggested that Roberta call the radio station to get "her facts" straight because her information on classes being held was contradictory to what he heard on a radio broadcast.

But hectic or not, the switchboard certainly cannot be called "routine," not when a call comes in from a boy frantically explaining that he's bleached his hair and HOW could he get his own hair color back!

With personnel like Ed, Larry, and Roberta not only enjoying their jobs, but constantly striving for more efficiency, ISUE encounters little difficulty in maintaining a well-run university.

As the switchboard lights up, veteran switchboard operator Roberta Schweizer calmly relays university calls to the proper ISUE office.

ACADEMIC AFFAIRS VICE-PRESIDENT APPOINTED

Robert Louis Reid, currently Dean of Social Science, Sangamon State University, was appointed by the Indiana State University Board of Trustees to the position of Vice-President for Academic Affairs for the Evansville Campus, effective January 1, 1975.

Vice-President Reid earned a B.A. in History from St. Olaf College, Northfield, Minnesota and an M.A. and Ph.D. in History from Northwestern University, Evanston, Illinois. He was a Teaching Assistant and Lecturer at Northwestern University and earlier taught in Deerfield High School.

Dr. Reid was on the history department faculty and subsequently served as Assistant Dean of the College of Arts and Science at Miami University, Oxford, Ohio. While on leave from that position he served as Assistant Director for Programs for the Illinois Board of Higher Education. Since 1971 Dr. Reid has been Dean of Social Science at Sangamon State University at Springfield, Illinois.

Six candidates were selected for interview from the 240 applicants by the Campus Search Committee. The six candidates were

interviewed and evaluated by members of the Campus Search Committee, members of the Academic Affairs staff, and Campus Administration. The credentials and evaluations were reviewed with ISU President Alan Rankin and selected candidates were then interviewed by President Rankin and the Vice Presidents at the Terre Haute Campus. Three Board of Trustee members also participated in the final review selection processes, prior to recommending Dr. Reid for appointment by the Board of Trustees.

Dr. Reid, his wife, Joanne, and their two children will move to the Evansville area in late December.

film series

The Film Series at ISUE offers quality cinema to the general public and ISUE student body. The scheduled movie is shown twice, at 2:00 p.m. and 8:00 p.m. in ISUE Blue Room 126.

The Series includes these films:

Oct. 10 Winter Light

Oct. 17 The New Cinema

Oct. 24 The Devils

Oct. 31 Quackser Fortune has a

Cousin in the Bronx

Nov. 7 Marat/Sade

Nov. 14 Umberto D.

Nov. 21 2001: A Space

Odyssey

Dec. 5 Claire's Knee

Dec. 12 Directed by John

Ford

Admission is \$1.00 per person payable at the door.

ACCREDITATION RECEIVED

Indiana State University Evansville received notification in July 1974 that the North Central Association for Colleges and Universities is granting operationally separate accreditation for ISUE. The accreditation decision on the part of North Central is recognition of the quality of faculty, administration, staff, educational programs, services and facilities developed by the new campus. The accreditation is for the maximum time of five years. The Evansville campus has previously operated under the Terre Haute campus accreditation.

A self-study for the North Central Association evaluation was developed under the direction of Professor Wallace Wardner. A seven-person evaluation review team visited the campus in March, 1974, for an on-site evaluation.

The evaluation review team report was filed with the North Central Review Committee which met in Chicago to review campuses seeking accreditation or reac-

creditation. President David Rice and Vice-President Donald Bennett represented the campus before the Review Committee.

In arriving at its accreditation decision, the North Central Association studied institutional resources, faculty, physical plant, Library, community relations, and University organization and governance. The operationally separate accreditation comes at the beginning of the tenth year of operation of campus which has been under the direction of President David Rice since 1967. Community citizens, area legislators, and civic and professional organizations have participated extensively in the efforts to develop a significant public higher education campus for this area of the state. These efforts were lauded by the evaluation committee in their report to the Review Committee as they recommended accreditation of the campus based upon the quality of resources and programs which had been developed.

PLAYHOUSE FACELIFT "lifts" TOTAL THEATER PROGRAM

by Candy Roscoe

ISUE Theatre hasn't always belonged to the University. Originally, the playhouse was the Catholic Theatre Guild. In the fall of 1970 the University purchased the building from the Evansville Diocese. At that time, the theatre could only be described as "primitive." But, what was lacking in the facility was compensated for in enthusiasm, initiative, and a lot of ingenuity exhibited by a group of dedicated students and faculty.

Between 1971 and 1973 the fledgling group produced LION IN WINTER, HALF WAY UP THE TREE, MARY STEWART, ANTIGONE, and THE MAN WHO CAME TO DINNER under the direction of Clayton Crenshaw, Director of Theatre.

During the summer of 1973, a new name appeared on the program--Jim Jackson. Mr. Jackson, well known in local theatre circles for his work both as an actor and as a director, donated his time and efforts for ISUE's first summer production ever, HAPPY BIRTHDAY WANDA JUNE. Mr. Jackson brought with him a wealth of experience, not only in amateur theatre, but also in professional theatre, television, and the cinema. Jim Jackson became an official

director for ISUE Theatre during the Fall Semester of 1973. Since that time he has directed the very successful ONE FLEW OVER THE CUCKOO'S WHERE HAS NEST. TOMMY **FLOWERS** GONE?, and THE BOYS IN THE BAND. His work is continuing through the 1974 academic year. His first production for Fall THE Semester is BALLAD OF THE SAD CAFE. In addition, he

The ISUE theatre emblem, designed by Ernie Kamatoy, employs the traditional symbols of the comedy-tragedy mask, long a symbol of thespian activity.

will be directing the entry to the American College Theatre Festival Association competition.

ISUE Theatre was expanding during the Fall Semester, 1973. In addition to Mr. Jackson's direction, a new staff member was added to the Theatre faculty. Lourdes Kamatoy, affectionately known as Lulu to her friends and students, joined the theatre troupe. Lulu came to us from New York, and has had professional experience in England. She added new dimensions to the theatre with her training in acting, make-up and dance.

Mrs. Kamatoy brought with her more than experience, training, and vivaciousness. She also has an exceedingly talented husband, Ernie, who designed the first major changes in the Playhouse itself. Ernie, an Art Director for Keller Crescent, removed the blue exterior of the Playhouse for an exciting new look. He chose a brilliant white combined with vibrant yellow, orange, and red in super graphic patterns which swirl over the front of the building and stretch down its sides. The interior of the Playhouse was not neglected. The artwork was repeated in the auditorium, and the entire building received

a new coat of paint. For the lobby area, Ernie designed furniture which complimented the decor and covered it in luxurious black fur.

Since the first refurbishment of the Playhouse occurred, other dramatic changes have taken place. The old dilapidated ceiling was discarded for white accoustical tile. The pinpoint house lights have been replaced with modern lighting controlled by the lighting panel. Theatre patrons are certain to be more comfortable in our newly spaced, continental, plush red seating. Carpeting has been added to the lobby area, and to the theatre aisles. Ushers will be handy to assist theatre-goers in parking their automobiles and finding their seats.

ISUE Theatre in its offering of current as well as classic plays will be broadening its capabilities with our first musical, YOUR OWN THING, which will be our first show for Spring Semester, 1975. Mrs. Kamatoy will be directing and choreographing YOUR OWN THING while continuing her work as Coordinator of the newly formed ISUE Theatre Society. Initiated during the run of RING ROUND THE MOON, the Theatre Society is a group of friends which assist in the financing of student scholarships and major improvements which are still desperately needed for the Playhouse and for our theatre curriculum.

ISUE Theatre has come a long way in a few short years, but is still in desperate need for additional faculty, and improved facilities. We are in need of air conditioning, and a new lighting and sound system. With these improvements, our long range goals can be attained.

the GRADUATE ROUNDUP

by Elizabeth Buck Office of Alumni Affairs

The Graduate Round-Up features alumni of Indiana State University Evansville who are making noteworthy contributions in their respective fields. Information is gleaned from the Alumni Information Card, friends of alumni, and the Alumni Association officers and Executive Board. Alumni are invited and encouraged to record their accomplishments on the Alumni Information Card (found on page 5) and return it to the ISUE Office of Alumni Affairs.

Mary Ann Alles, who received an Associate Degree in Secretarial Administration in 1974, has accepted a position at ARKLA in Evansville.

Roy Autry, a 1974 graduate and psychology major, was married September 7 to Carolyn Zehner of Evansville. Roy is on the staff of the Children's Psychiatric Center in Evansville. The couple will make their home in Elberfeld.

Perry Bailey, 1974 graduate with Social Science major, is teaching and coaching in St. Leon, Indiana, northwest of Cincinnati, Ohio.

Gregory C. Barnett, 1973 history graduate, is pursuing graduate work toward a Master of Divinity degree at the Lutheran Theological Seminary in Gettysburg, Pennsylvania.

Ralph Barwe, class of 1973, has accepted a position in cost accounting with the J. H. Baldwin Company of Cincinnati, Ohio.

Douglas Bristow, 1973 graduate in Business Management, is Director of the Physical Plant, United Hospital, Grand Forks, North Dakota. Doug and his wife Jimmie Sue have a daughter Sherri and a son Scott.

Karen Combs, 1974 graduate in Accounting, is now employed in Indianapolis with Coopers & Lybrand. Karen was the Homecoming Queen candidate representing the Alpha Kappa Psi Fraternity in 1973.

Bonnie Damm, 1973, recently became Mrs. James Lee Becht. Bonnie earned a BS in Public Health Dental Hygiene from Indiana University. Dr. Becht graduated from Purdue School of Veterinary Medicine. They are making their home on Lafayette Road in Indianapolis.

Don Daniels, 1973, spent the past two summers in Yellowstone National Park as a Park Ranger. This fall Don is teaching at Southridge High School in Huntingburg, Indiana. He will work with the school newspaper, the yearbook, audio visuals and drama.

Stanley Skelton, class of 1973, has accepted a teaching position with the Warrick County Schools in Tennyson,

FIRST ISUE TWINS. ISUE graduate Jackie Verville and her husband Tom are the proud parents of twin sons Christopher Thomas and Craig Thomas born this past summer.

Indiana. He is teaching Science to 6th, 7th, and 8th grade students.

David J. Townsend, class of 1971, has accepted a new position as Educational Coordinator with Medco Corporation in Evansville. Dave, his wife Patricia, and their daughter Katherine Anne, age 2, make their home at 600 N. Lemcke Avenue in Evansville.

EAGLES FIND A HOME

New head basketball coach and athletic director Wayne Boultinghouse discusses sports at ISUE

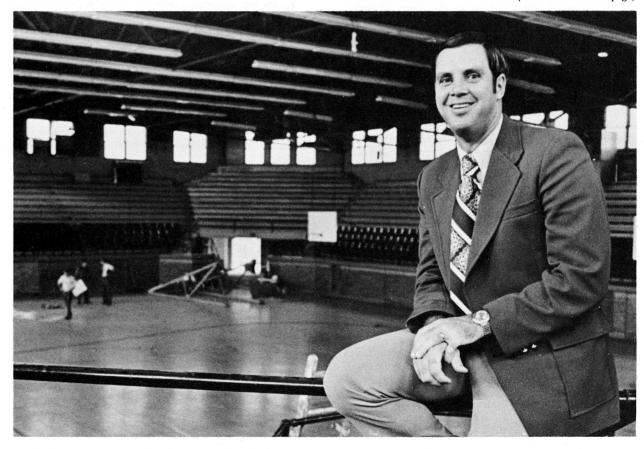

Athletic Director Wayne Boultinghouse surveys the progress in ISUE Central Arena. The arena is undergoing various renovations including a new coat of paint and new surface on the gym floor. The ISUE Eagles debut against Franklin College in the arena on December 14, 1974.

When newly appointed ISUE Athletic Director and Varsity Basketball Coach Wayne Boultinghouse talks about the upcoming basketball season the adjective, first, dots the conversation. And it's easy to see why. This is Coach Boultinghouse's first year at ISUE and his first position as head coach. The Eagles will practice and play home games in the ISUE Central Arena (formerly Central Gvm) and for the first time have a home court advantage. New opponents appear on the schedule. ISUE will be playing Colorado State, Wyoming, and Southeast Missouri State both home and away. And ISUE has five new recruits to add to the seven returning lettermen from last year's squad. And another

first Wayne Boultinghouse isn't talking a great deal about but wishing strongly--a winning season.

"There are just too many unanswered questions to predict what is ahead in the basketball season. I'll have to see the players in action and see how Central Arena shapes up," Boultinghouse explains with his winning smile.

Renovations of Central Arena are underway. The playing floor is being resurfaced and lengthened for college basketball and new goals are being installed. Mr. Boultinghouse says the floor will be "the finest in the city." Painters are at work changing the interior of Central Arena to shades of red, white, and (continued on next page)

EAGLES FIND A HOME (continued)

blue, ISUE's school colors. Seating capacity is 4195 with 467 chair back seats. And the Coach affirms "all seats are good seats in Central Arena." And he adds, "People will be surprised at the amount of parking available near Central Arena. I think we can build a strong core of support for the young club."

Returning lettermen on the squad are 6'7" Jim Crisp, Center; 6'6" Fred Chase, Forward; 6'1" Ernie Brothers, Guard and last year's leading scorer; 6'1" George Davidson, Guard; 6'5" Ralph Schickel, Forward: 6'3" Gary Williams, Forward; and 6'4" Terry Kirchoff, Forward. New recruits are Mark Osterman, 6' 61/2" all city center-forward from Mater Dei High School; 6'41/2" DeJuan "Spider" Rowser, a transfer from Monroe Community College who averaged 10 points and 14 rebounds a game; 5'11" guard Lennon Baccus, a transfer from Monroe Community College who averaged 18 points and 12 assists a game; 6' guard Mike Torain, an excellent playmaker from Christian County High School, Hopkinsville, Ky; and 6'61/2" Eric Taylor also of Christian County High School who averaged 10 points and 10 rebounds a game.

The opening home game of the season will be on December 14 when the Eagles meet the Grizzlies of Franklin College. "Homecoming is scheduled on that date so we hope to see ISUE alumni supporters, in addition to Central High School alums and Evansville community persons who enjoy good basketball. It would be great to fill the arena that first game," the Coach says as he plans season ticket sales.

A Junior Varsity team is also in formation stages. The Junior Varsity team, to be coached by Don Ramsden, Assistant Basketball Coach, will give young ISUE college players an outlet for college experience. Their games will precede the varsity games.

In short term goals how does Wayne Boultinghouse see the season shape up? He has four easily-stated aims. First, he wants a winning season. Second, he would like a post season tournament bid. Third, he hopes to increase fan support and fourth, he plans to continue to develop an attractive schedule. Just a wild dream you say? You haven't met Coach Wayne Boultinghouse!

In addition to duties as Head Coach of the Screaming Eagles, Wayne Boultinghouse is also athletic director. ISUE currently engages in four sports at the varsity level: baseball, tennis, golf, and basketball. Jim Brown, Instructor in Physical Education and Director of Intramural Sports, coaches the baseball team. The golf team is under direction of of Jim Hamilton, a former ISUE golf star who turned pro his senior year. Jack Marr, Assistant Professor of Life Science, coaches the tennis team.

Indiana State University Evansville is an associate member of the National College Athletic Association and National Association of Intercollegiate Athletics. The University received North Central Accreditation this summer which allows the college to apply for full membership in NCAA. The papers are being processed for full membership, Mr. Boultinghouse indicated.

Assisting with Central Arena management, sports information, and ticket sales is Ron Lyles of Evansville. Vicki Nix also of Evansville is the secretary in the athletic office. The athletic offices are in Central Arena.

Central Arena is buzzing with activity-painters adding numbers to seats, movers arriving with equipment, and an anxious coach ready to play ball.

VARSITY CLUB ELECTS OFFICERS

Clarence Altstadt of Altstadt Business Forms has been named Chairman of the Screaming Eagles Varsity Club. Other officers are Marvin Smith, Secretary; Rolland Eckels, Public Relations; and Bill Muller, Treasurer. The Varsity Club is the official booster organization for varsity sports at ISUE and is open to all persons interested in ISUE athletics.

The Varsity Club is planning the third annual Stag, an occasion when the Varsity Club members can meet the athletic director and varsity coaches and get a preview of the athletic talent for the year. The Stag will be held in late October. A date was not definite as of press time.

NINE JOIN ISUE FACULTY

O. Wayne Boultinghouse was named Athletic Director and Varsity Basketball Coach. A native of Rockport, Indiana, Mr. Boultinghouse received his baccalaureate and master's degrees from the University of Evansville and was assistant basketball coach for the Aces and assistant athletic director at the U. of E. for five years.

Associate Professor of Education, Aldo Cardarelli of Syracuse, N.Y. will teach in the field of elementary education and direct the Metro-Core Program. Dr. Cardarelli was Assistant Professor and Director of the Teacher Corps at the University of Nevada in Las Vegas. A graduate of LeMoyne College, Dr. Cardarelli received his master's and doctoral degrees at Syracuse University.

Jack M. Cascione of Detroit, Michigan has been named Assistant Professor of Art, and will be teaching printmaking and painting. Mr. Cascione received his baccalaureate degree with a major in art at Concordia Teachers College in Seward, Nebraska, and his M.F.A. degree at Southern Illinois University in Edwardsville, Illinois.

Assistant Professor of Political Science, Quenting Davis previously held research and teaching positions as a graduate student in the Political Science Depart-

ment at Purdue University. He received his baccalaureate and master's degrees at Purdue University, and will be completing his doctorate in the near future.

M. Edward Jones has been named Director of Continuing Education and Coordinator of the University Center. Dr. Jones previously held the position of Assistant Dean of Northwestern University Evening Divisions in Evanston-Chicago, Illinois. A native of Owensboro, Ky., Dr. Jones received his bachelor's degree from Brescia College, his doctoral and master's degrees from Indiana University.

An Iowa native, Glenda J. Klass holds the position of Grants and Contracts Officer in Accounting. Mrs. Klass graduated from the University of Evansville in 1974 with a B.S. degree in Business.

Barry Schonberger has accepted the newly created position of Student Activities Director with his office in the University Center. A native of St. Paul, Minnesota, Mr. Schonberger received his baccalaureate degree in physical education and recreation from Bemidji College in Bemidji, Minnesota.

Other new faculty are Johnny Reising (see Graduate Roundup, p. 12) and Anthony Tilmans (see story, p. 6).
