**For Immediate Release
January 24, 1991**

A two-day course covering the fundamentals of geometric dimensioning and tolerancing in manufacturing is offered by the University of Southern Indiana's Office of Continuing Education.

The class will meet on Saturdays, February 9 and 16. It is open to product designers, manufacturing engineers, quality assurance personnel, and production workers, supervisors, and managers. Participants are expected to be familiar with shop math and interpreting part prints.

The \$295 registration fee includes textbook and other materials. Call the USI Office of Continuing Education, 812/464-1863, for information or to register.
