For Immediate Release
January 29, 1989

Understanding all the gadgets hanging off your computer can make using it much easier -- for example, you probably can do more with your printer than you think.

A three-hour class in computer peripherals -- printers, plotters, tablets, mice, and joysticks -- will meet on Saturday, February 11, as part of the University of Southern Indiana Office of Continuing Education's spring noncredit computer instruction.

Other courses will include the popular IBM/PC-DOS (Disk Operating System) -- another section has been added on Saturdays, February 18 and 25, to accommodate demand -- along with advanced DOS, introductory and advanced LOTUS 1-2-3, Wordstar wordprocessing, and others.

Call the USI Office of Continuing Education, (812) 464-1863, for information or to register.
