

# Ramsden Named Director Of Veterans Affairs

Attention vets — a former fly-boy has been named to rule the roost on veterans' affairs here on campus.

Donald E. Ramsden has been named Director of Veteran Affairs at ISUE. The position was made available from a federal grant of \$15,367.67 awarded to ISUE under the Cranston Amendment Cost-of-Instruction Payments for Veterans. The primary function of the office will be to provide counseling, tutorial and motivation programs and information about higher education to the Vietnam-era veteran.

Mr. Ramsden served in the U. S. Air Force based at Mather Air Force Base in

California. He just separated from active duty in July. For the past three years, he was an instructor-navigator and taught all phases of navigation. Mr. Ramsden taught basic and advanced techniques in-flight while accruing an average of 60 hours of flying time per month. He assisted course development personnel in the writing and revision of training materials. Also during this time, he served as Phase Project Officer of Night Celestial, Squadron Athletic Officer, and Squadron Flying Safety Officer.

In 1969, Ramsden was navigator of a C-130 transport flying air support in Southeast

Asia. He was based at Udorn Royal Thai Air Base in Thailand.

Before entering the Air Force, Ramsden received his formal education at the University of Evansville with a Bachelor of Arts degree in physical education. While at U. of E., he served as President of Tau Kappa Epsilon social fraternity.

Ramsden received his Master of Arts degree at Chapman College in Orange, Cal.

The ISUE Office of Veteran Affairs will provide information on V. A. education benefits, remedial and special education programs, part-time job development and

placement listings; referrals and linkages to community resources such as Veterans Administration, Legal Aid, and other agencies which can provide supportive services.

The Office of Veteran Affairs will be a division of the Student Services area at ISUE.

Free health services are available on the ISUE campus to all students, faculty and staff in room 115. Free first aid, minor treatment and major emergency services are easily accessible. Any counseling or advice needed for either medical or personal problems will be given. This department can function as a

good source for advice or referrals to public and community agencies. A full-time registered nurse with a B. S. degree in nursing is on duty from 8 a.m. to 4 p.m. Monday through Friday.

Another service offered to ISUE employed is a blood bank. There is only a minor obligation for a service that can be very helpful.

Any question regarding information pertaining to these subjects is available from Patricia Like, R. N., in the Student Health Clinic. The extension number is 258.

## Y. E. S. Opens

### Drug Center

Oct. 1 is the tentative date for the opening of the city's newest drug rehabilitation center operated by the Youth Emergency Service on Old Boonville Highway just east of the city.

The Therapeutic Community, according to Dr. Ralph Zehner, president of the board of directors of the group, is planned to be a counseling center where people under 35 years of age with a drug problem may go and seek help through social workers and encounter groups.

The converted two-story farmhouse, now in the process of being remodeled, will eventually accommodate up to 20 people on a live-in basis.

A federal HEW grant of \$300,000 is nearly exhausted due to remodeling costs, cost of food for one year for those living-in and salaries of the six-man, full-time counseling staff. Dr. Zehner has sent out a call for part-time volunteer staff members from area colleges.

The greatest need, Dr. Zehner points out, is donations of typical household items such as bedding, pillows, knives and forks, etc. For instance, the group received 20 army-type beds by donation but have no mattresses which will fit them.

George Brenner, a graduate of the University of Evansville, is busy preparing the house for its October opening. Brenner, along with several other undergraduate psychology students, has been working for some time refurbishing the old house. It is the only rehabilitation house of its kind south of Indianapolis.

Dr. Susan Donaldson, professor of psychology at ISUE, has been instrumental in arranging for her classes to help as volunteers at the community in painting, cleaning and as part-time staff members.

Anyone interested may contact Dr. Ralph Zehner at 867-5395, or visit the community at 5600 Old Boonville Highway. The house phone number is 479-6411.

Any and all help will be appreciated.

## University Center Progressing

By PEGGY NEWTON

Construction of the long-awaited University Center next to the library is expected to be completed in late February 1974. The Center, the third major building on campus, is located at the center of the campus where students, staff, and faculty can meet for informal luncheons, study, conferences, discussions and formal campus events.

Construction of the tri-level building, on which Hironimus, Knapp, Given Associates served as architects and Ewing Miller served as design architect, began Nov. 8, 1972 with the groundbreaking ceremonies. Because of delays on construction, completion date was moved from Dec. 1973, which was the original completion date, to late February.

The lower level of the Center will include: a recreational area, rooms for storage and mechanical equipment rooms for the student union, student government, campus publications, a conference room and a student organization suite. The ground level will house the bookstore, a grill and lounge, interview rooms, a counseling area, the Dean of Students' Office, the Office of Career Placement, a conference room and the Office of the Director of the University Center. The upper level will house a lounge, kitchen, conference room, formal dining room and terrace. The terrace will offer views of the campus and the surrounding area.

After the Center opens, the bookstore will be moved from its present location, which will be remodeled for the expansion of the dental auxiliary programs. The Temporary Union Building, which has served quick lunches since its opening in Oct. 1970, will house second-year academic of-

Photo credit — Walt Messex

ferings for the Evansville Center for Medical Education under the direction of Indiana University. The Evansville Center for Medical Education already offers first and fourth year curricula.

As state funds may not be used for the University Center, funds are aided by bonding authorizations through the Federal Interest Subsidy Grant. State Senators Robert D. Orr (now Lieutenant Governor of Indiana), and Sidney Kramer, and State Representatives John Cox, Jerry Lamb, Robert

Richard Jr., and Harry Thompson aided in the \$1,575,000 bonding authorization passed by the 1969 General Assembly. In the 1973 General Assembly, Senators Harry Thompson and Philip Hayes, and Representatives J. R. Harris, Frank Schuetz, H. Joel Deckard, Robert Richard Jr. and Gregory Server aided in the \$325,000 bonding authorization. With student fees of \$191,000 added to the amount of the two bonding authorizations, the total cost of building the University

Center is \$2,091,000.

The Donor Recognition Program, which allows individuals, families, organizations and companies to furnish rooms or areas and to specify the room name, will raise approximately \$150,000 to furnish and equip the building. Over \$120,000 has already been given to the Donor Recognition Program.

With the University Center nearing completion, attention will be given to the fourth major construction project. Bids for the Applied Science Building were taken Sept. 5.

## Fall Productions Readied

Tryouts for "Johnny Moonbeam and the Silver Arrow" were held at the ISUE Playhouse on Sept. 5 and 6. Johnny Moonbeam is a children's play done in dance and mime and having only one major speaking role. This production is being done in cooperation with the Evansville Children's Theater League. It is directed by Clayton Crenshaw. It will be presented by a seven-member cast supported by several

extras in the Vanderburgh Civic Center Auditorium at 2 p.m. on Sunday, Oct. 7.

A second production, "One Flew Over the Cuckoo's Nest," is also being readied for fall presentation. Open tryouts will be held Sept. 13 and 14 at 7 p.m. at the ISUE Playhouse. A cast of 17 men and 5 women is required. All interested parties should come to the Playhouse. This play will be the American College Theater Festival — 6

entry for 1973. This production will be directed by Jim Jackson. The play will be presented at the ISUE Playhouse Nov. 16-18 and Nov. 23-25.

Crews are always needed for work behind the scenes. If you are the stage frightened type but still want to take part in the fall productions, please go to the Playhouse at 3001 Igleheart Ave. to offer your services. All help appreciated.

# Quit Your "Beefin"

By Vicki Voegel

No, not ground beef, not steak or any other high cost item. The beef to which we refer is a cut we can all afford. About this time of the year a gourmet beef item is the ISUE bookstore. Having, until very recently, been connoisseurs of this beef bonanza, we were as unprepared as you are for the facts uncovered with a little research and a little time spent.

Prime Rib of Rip Off! Nonsense! This particular dish is relatively scarce. Not the beef freeze, just non-existent except in the minds of the uninformed.

A student who purchases a new text book for \$10 is paying just \$2 more than the 80 per cent of retail that the bookstore is forced to pay. Most hard cover books are priced at or below the manufacturers' list prices. Only in the hard bound books is there any choice in price determination. Paperbooks come pre-priced from the publisher as is evident to even the most ardent prime rib of rip off gormandizer by a quick glance at the cover of his next paperback purchase. This is not to say that the soft cover book is sold at the price paid the wholesaler but the immense margin of profit suspected by all simply does not exist.

Beef Swellington and Beef Smellington or first the good news, then the bad. The used book area is one which many expound upon at great length and with more than a little justification. However, more than a few facts are necessary before we can receive an adequate sampling of Swellington and Smellington.

First the good news. Your bookstore buys back used text books as a student courtesy. In many college bookstores across the country, or even across town, no texts are repurchased. Your books are bought back even when they are not used again the following semester often resulting in a loss to the store. (Yes, friends and fellow beefers, loss! The figures are there to be seen by those who trouble to look.) These books are bought from you at the price the bookstore will be able to obtain from the wholesaler on return or resale. What seems to be outright thievery in many instances is indeed charity. However small and outrageous the price may seem, your palm has at least been crossed with silver.

Beef Smellington comes in two varieties both of which are sampled at the quick lunch counter in the basement bookstore. The main characteristic of the first is the insignificant amount of cash returned on an expensive book while the second is the total lack of cash returned on books costing less than \$2.95.

When there is only one beef in town, it is amazing the amount of bull generated. Before you join the slingers, do a little checking. The bull is always deepest where there is no effort expended. There are inequities in every system but, at the moment, it's only one we have and we have to live with it as is.

# Teachers Work In Fish Bowl

Students from the local school system will be pleased to hear that a few of their teachers ended up in a fish bowl over summer vacation.

There wasn't any water in the bowl though, only other teachers, counselors and administrators from the Evansville-Vanderburgh School Corp. The fish bowl session was part of a week long sensitivity session being held as part of the summer workshop on human relations here at ISUE.

A team of consultants from the University of Wisconsin was brought in by Dr. Glenn L. Kinzie, the workshop's Project Director, to organize the sensitivity week program. The consultants were Dr. Max Goodson, Dr. Roland Buchanan and Ms. Karen Dirlam.

Under the consultants' supervision, the participants of the session were given training in listening and speaking skills. The session was designed to train teachers to communicate effectively with students of all ethnic groups. To accomplish this goal, the consultants utilized some new approaches to train participants in listening skills.

One of the methods used by the workshop was the listening triad. In this method, three people form a group discussion with each participant assuming the roll of either the speaker, the listener or the observer. The speaker then talks on his chosen subject for three to five minutes. When the

speaker has finished, the listener paraphrases back to him what he has heard with the observer acting as a monitor on the results. This exercise stresses the need to say what is meant and to hear what is really said.

The fish bowl method was also used to sensitize the participants and their communications skills. In this exercise, a large group forms an inner circle of active participants surrounded by an outer circle of observers. A topic is then chosen and discussed by the members of the inner circle while the observers monitor the conversation. Members of the outer circle may join the inner circle for brief periods. Again, this exercise is aimed at improving listening skills.

The fish bowl and the triads are only two out of many methods that the workshop used during sensitivity week.

Too many people listen and never hear. This is an important contributing factor in many conflict situations, especially in classrooms where many different ethnic groups are represented. Ineffective communication between teachers and students of differing ethnic groups hampers the learning process. By improving the ability of its participants to communicate, the workshop hopes to avoid classroom conflicts caused by ineffective communication and cultural bias in the local school system.

# Activities Day Held

New students were offered the opportunity to familiarize and inspect the ISUE campus organizations at the annual activities day held Aug. 30 in the forum.

Members from the 11 organizations represented, created and set booths at random throughout the area. Each club distributed information to the new students that filed through the forum during the day.

Fraternities cooperating with the annual fall event were Sigma Tau Gamma, Alpha Omega Psi, Tau Kappa Epsilon and Chi Gamma Iota.

Sororities participating in the festivities were Sigma Sigma Sigma, Phi Beta Chi, Sigma Kappa and Alpha Sigma Alpha.

The Chess Club ISUE Jaycees, Student Education Association and Student Senate were the only groups in the forum that were not greek orientated.

# Culture On Campus

Evansville's cultural happening of the year, according to Dr. Scavone, will take place at ISUE this year. Mr. Minas Christian, Conductor of the Evansville Philharmonic Orchestra, will present a course of lectures at ISUE designed to provide background and analysis of the music to be offered in the current season of the Evansville Philharmonic Orchestra. The lectures will begin at 7 p.m. for four sessions on Sept. 20, Oct. 18, Nov. 15, and Nov. 29.

Persons interested in an enriching musical experience and in deriving deeper understanding and appreciation of music as invited and encouraged to attend the sessions. Dr. Scavone, ISUE Associate Professor of History and Coordinator of this special class, commented that Mr. Christian is one of the most articulate and astute musical minds in the Midwest.

Mr. Christian will be lecturing on subjects relating to the first four concerts of the 1973-74 season. His subjects will be the World of Gilbert and Sullivan on Sept. 20; Van

Cliburn, Piano on Oct. 18; Sidney Harth, Violin, on Nov. 15 and Chihiro Kudo, Violin, on Nov. 29. All of the lectures will be held previous to each of the four concerts. The concerts will be held on Sept. 22, Oct. 20, Nov. 18 and Dec. 2.

Van Cliburn will be playing Rachmaninoff's Concerto No. 3, Stravinsky Firebird Suite and Wagner Prelude and Liebestod from Tristan and Isolde.

Sidney Harth will be playing Mendelssohn's Concerto in E minor; also Strauss, Overture to die Fledermaus and Goldmark, Rustic Wedding Symphony.

Chihiro Kudo will feature Bach Concerto No. 1 in G minor; also Handel, Suite from the Water Music and Brahms, Symphony No. 4.

Fee for the four lectures by Minas Christian is \$10 for the general public and \$5 for ISUE students. Persons can enroll at the office of Career Placement or by contacting Dr. Scavone, Ext. 225. All sessions will be held in the Rare Books Room of the University Library.

It was back-to-school, then back to the bookstore for the ISUE student pictured above. According to Cathy Will, assistant to the president, enrollment has dropped this fall at isue.

Photo by Walt Messex

# Dates Released For Film Series

Break out the popcorn — the fall schedule for the ISUE fine-film series has been set.

The 14-film schedule is once again being shown each week on Thursday at 2 p.m. and 8 p.m. in the Blue Room. The films are shown as course work in the three-credit-hour "Introduction to the Film" class. The class is open to all students and the general public is invited to attend the entire film series.

An admission charge of \$1 is charged non-class members and is payable at the door. Season tickets (good for all 14 films) are available at the ISUE Business Office for \$7.50 each.

### Film Schedule for Fall Semester

Sept. 6	"The Culppeper Cattle Company"
Sept. 13	"Citizen Kane"
Sept. 20	"The Fixer"
Sept. 27	"Un Chien Andalou and the Cabinet of Dr. Caligari"
Oct. 4	"The Gospel According to St. Matthew"
Oct. 11	"Jules and Jim"
Oct. 18	"America, America"
Oct. 25	"The Treasure of Sierra Madre"
Nov. 1	"Rosemary's Baby"
Nov. 8	"The Magician"
Nov. 15	"Rabbit Run"
Nov. 22	"Series of Propaganda Films 1"
Nov. 29	"Who's Afraid of Virginia Wolf"
Dec. 6	"2001: A Space Odyssey"

# Since you asked . . .

Is there any sort of training course for those teachers who take part in advisor programs? If not, is there any possibility of one in the future?

S. R.

At this time, there are no courses required for any teacher who advises students

on their curricula. Each advises only in his given area where it must be presumed he knows the requirements for graduation.

There are no plans to force teachers to take part in a training session. As no psychological counseling is required of a college advisor, it is felt no special training is necessary.

The burden of course, fulfillment, rests with the student. It is the student's duty to himself to be aware of the requirements of his area. If you have several semester hours behind you, now is the time to be sure you are meeting the prescribed course of studies. Graduation is ultimately a student responsibility. No advisor, good or bad, can take on that responsibility.

The first phase of adding the fourth, major building-complex at ISUE has been completed.

The bids were received Sept. 5 for the Classroom Applied Science Technology Building, as authorized by the 1971 General Assembly. Following the 1971 Indiana General Assembly, the Commission for Higher Education, the State Budget Agency, and the Governor's Office approved funding authorization, naming of architects for the project, and construction of the project. A year elapsed during these proceedings. The architects for the project are Hironimus-Knapp-Given Associates of Evansville. Ewing Miller Associates of Terre Haute are design architects.

The 1971 Indiana General Assembly authorized academic facilities bonding of two million dollars and appropriated \$500,000 from the Post War Construction Fund for project and site developments of the Classroom Applied Science Technology Building and the University Center, which is currently under construction. Site developments will be bid later.

The Classroom Applied Science Technology Building will include classrooms and faculty offices, a learning resources center, and centers for communication processes, materials processing and power processing.

The materials processing and power processing wing of the building will be a one story structure; the Communications Center, Learning Resources Center, and classrooms and offices wing will be a two-story structure. The building will define the academic arc for the campus and will be located in the south quadrant of the arc.

The Classroom Applied Science Technology Building is one of five basic buildings planned from inception of ISUE in the first phase of the master plan for the campus. The first five buildings were

planned for specific functions with some areas in each used for general purpose classrooms.

In 1967, Southern Indiana Higher Education, Inc. gave an initial 120 acres from the 1,400 acre Mid-America University Center complex to Indiana State University. The 1967 Indiana General Assembly authorized construction of the first structure on the Evansville campus. The General Classroom and Science Center Building was completed in the fall of 1969. The University Library, authorized by the 1969 General Assembly, opened in January 1972. The University Center is scheduled for completion early in the second semester of this academic year, and the Classroom Applied Science Technology Building will be completed during the Spring of 1975. The fifth basic building for the campus is the

Health, Physical Education, Recreation Building which has been authorized by previous Indiana General Assemblies subject to funding capabilities.

The ISUE campus has been hampered from the beginning by inadequate space for the number of students enrolled and inadequate space for many instructional functions.

The apparent low bidders for the project were: Deig Brothers of Evansville for general construction; Raymond J. Goedde of Evansville for plumbing, heating and air conditioning; Rottger Electric Co. of Evansville for electric work; and Carpetland U. S. A. of Evansville for carpet installation. Bidding on interior equipment has not been completed. All contracts are awaiting approval of the University Board of Trustees.

# Golfers Win NAIA District Tourney Environment? What Price

By GREG SIMS

Coach Jerry Altstadt feels that his basketball team will be good, but now Altstadt is glowing over his golfers. The Eagles advanced to the N. A. I. A. National Golf Finals, and finished a very respectable 15th out of 34 entries. The Eagles performance is even more impressive when one discovers that the only school in the northern part of the country to finish better was Edenborough State.

The Eagles started their trip to the finals by winning their N. A. I. A. district which consisted of 23 other Indiana schools. The Eagles finished the 36 hole medley play with a 587 total. Taylor finished second at 592, Franklin took third with an even 600, and Rose Hulman finished 16 strokes back at 603 for the fourth position.

ISUE also won medalist honors in the tourney. Stan Covey shot 144, but Bill Thompson of Taylor matched Covey's total. Covey, however, won the medalist honor with a par on the first hole of sudden death. Dave Williamson was third at 145 and Jim Hamilton was fourth at 146. All three Eagle golfers were named to the N. A. I. A. All-District Team with Hamilton being named for the second straight year.

Although the Eagles did not finish in the top ten in the Nationals, it should be noted that ISUE was the first team from Indiana to make the 36 hole cut. The first 17 teams after 36 holes of play continue in the 72 hole event, but the last 17 are done for the year.

Displaying their NAIA national finalist plaque are left to right, Terry Hendricks, Jimmy Hamilton, Coach Altstadt, Stan Covey, Stan Winnecke, Dave Williamson. Photo by Walt Messex

The first five finishers in the tourney came from the southern and far west regions of the country. This may not seem to matter very much to the average sports fan, but just as the finalist in national competition in baseball come from the same area, so do the golf finalist. This happens because of better weather for golf in these areas, and bermuda greens are used in these areas. Because these bermuda greens are not used in the tri-state area, the Eagles were at a distinct disadvantage when trying to make those critical putts.

The fine showing the Eagles made during the summer months makes the Eagles' outlook for the coming year

very bright. The Eagles return all five golfers who made their trip to the Nationals, plus a group of very talented youngsters.

Leading the newcomers will be Jeff Musgrave from Rex Mundi in Evansville. Jeff will not be eligible till this spring because of transferring from another school, but Coach Altstadt feels that Jeff will put pressure on the first five in the spring. This fall the Eagles are looking for Jeff Davidson of Southmont and Doug Foster of Princeton, who was the Evansville high school sectional medalist in 1973, to be valuable assets in the Eagles' future.

The Eagles are hoping for a good showing in the Midwest Intercollegiate Golf Classic at Terre Du Lac Missouri from Sept. 21 thru Sept. 23. Last year, the Eagles finished third in their division and twelfth overall, but the team is hoping for a better showing this year. Some of the Eagles' opposition will include schools such as Wisconsin, Kansas, Kansas State, Bradley and Drake. If any student would care to watch the Eagle golfers in action, they may attend any home matches which take place from 1 p.m. and last to 6 p.m. It would be a great chance for the student body to watch the Eagles in action.

Environment is many things. It is a free flowing stream tripping over rocks in a shady woods, or it is a carefully planned and executed outdoor surrounding. It is the air we breathe, the world around us—and around here it has a high price tag.

The architectural firm of Hironimus, Knapp & Given has attempted, under contract, to create an outdoor environment in keeping with the spirit of this university. They have added shrubs, grass, vines, and trees in many areas. Gene Steinkamp is now entrusted with the care and keeping of these tender plants. Steinkamp does not anticipate the loss of any of these plants under normal circumstances.

"Keep off the grass" signs may seem a little ridiculous to the average student; however, before you go across the grass, stop, and think. This is a small request where a total investment (of \$17,000) is concerned.

As it is anticipated that there will be much discussion of the huge outlay of funds for landscaping among the students, The Shield plans to bring you, in greater detail, a report concerning how this money was spent.

## FALL 1973 BASEBALL SCHEDULE

Tuesday, Sept. 11	1:00 p.m.
Kentucky Wesleyan (2)	ISUE Field
Wednesday, Sept. 19	5:30 p.m.

## Accounting Club Formed At ISUE

The Division of Business has announced plans for the formation of The Accounting Club. According to Professor Wanda Hibbits, the constitution and the bylaws were being written during the summer. A general meeting is planned soon after fall classes begin. At this time, prospective members can attend and vote on the constitution and platform of the club.

The Accounting Club, open to accounting students with associate memberships for students in the business division, will be a functional, rather than a social organization. It will help students who want to get ahead in accounting. Tentative activities will include discussions and speakers who are in the field of accounting.

Students who are interested in joining The Accounting Club may attend the general meeting. Notices announcing the date of the first meeting will be posted. Students with specific questions before the meeting may contact one of the instructors in the accounting department.
