**AMERICAN ISSUES FORUM.** R. Buckminster Fuller, famous architect and educator, will give a public lecture at ISUE on the evening of February 25 at 7:30 p.m. in Room A126. His lecture will be on a bicentennial theme, "Utopia or Oblivion in America's Third Century." He has concluded that man's technological development has brought him to the point where he can supply his needs or destroy civilization itself.

Mr. Fuller, a mathematical genius and an engineer of rare and extraordinary foresight, has been a pioneer of revolutionary technical inventions, with his most famous creation being the geodesic dome. He is interested in using the dome to enclose entire communities, permitting total climatic control.

At age eighty, Buckminster Fuller is one of the nation's most sought after lecturers and authors.
